

Entry & Patio Door Systems  
Mountain Region

## Why Therma-Tru® Doors

### Uncompromising quality, inside and out.

#### #1 Among Building Pros

It's a brand you can trust. Why? Because year after year, building professionals rank Therma-Tru #1 – as the brand they prefer most – in entry doors.\*

#### Experience & Know-How

Behind every Therma-Tru door stands decades of experience and technical know-how. Therma-Tru makes or recommends every aspect – from the glass to the hinges – to bring your home durability and reliability through the years.

#### Lifetime Limited Warranty

When you pay close attention to every detail that goes into a door, you can stand behind its parts longer than the rest. That's why your Therma-Tru fiberglass door system is backed with a lifetime limited warranty – the industry's most comprehensive warranty of its kind.

#### Energy Efficiency

More than 80% of Therma-Tru door and glass options are ENERGY STAR® qualified and National Fenestration Rating Council (NFRC) certified, helping save money on energy costs.

## Why OrePac

#### Our History

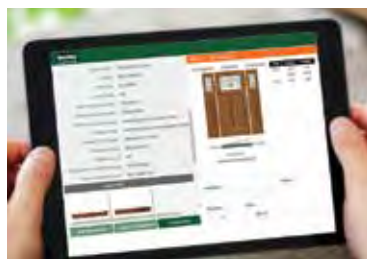

OrePac is a family-owned and operated business, founded by the Hart family in 1976. Through strong leadership and a commitment to success, the company has grown into one of the premier distributors in the building industry.

Trust, integrity, and a dedication to excellence are the values most important to OrePac. That commitment can

be found in the services we offer, the quality of the products we provide, and the way we treat our employees and customers. This dedication to our markets has enabled us to make a positive impact on the shelter industry and the communities we serve.

#### OrePac Marketplace

At OrePac, our goal is to **Make Complicated Simple™**. That's why we've created an industry-leading configurator to simplify the door ordering process for our dealers. Talk to your OrePac Sales Representative to find out more about this easy and time-saving tool.

# A Complete Door System

A Therma-Tru® door with genuine Therma-Tru parts is more than just a beautiful door. It's a complete door system – from the glass to the hinges – made to perform as good as it looks.

### ❶ Frame Options

We can help you choose the right frame for your door system.

### ❷ Removable Weatherstrip

Our resilient design compresses when closed and springs back when open. It's protected by a durable jacket for long-lasting sealing power.

### ❸ Hardware

Choose from beautiful options that will complement the look of your home and help bring you security and peace of mind.

### ❹ Ball-Bearing Hinges

Hinges with ball-bearings protect each hinge pivot, offering added support and stability to help keep your door opening and closing smoothly.

### ❺ 7-Shape Corner Seal Pads

(Inswing Only) This innovative design creates a protective air pocket that helps prevent a vacuum from wicking moisture up the weatherstrip.

### ❻ Composite Adjustable Sills

These allow flexibility to adjust the sill cap vertically to close gaps, helping to maintain a tight seal between the sill and the bottom of the door.

### ❼ Dual-Bulb / Dual-Fin Bottom Sweep

(Inswing Only) Two bulbs compress to sit tight against the sill, while two fins act like walls to form barriers and a built-in rain deflector pushes moisture away.

### ❽ Mullion Options

Mullions not only give the hinges and lock a place to anchor, they come in a range of sizes from 1"-3" in width per mullion to help create an entry door system to fit the opening of your home.

# What a DIFFERENCE a DOOR Makes

Now that's a smart investment.

## Are You Remodeling?

There are so many ways to renovate a home. But adding a stunning new Therma-Tru entry door is one sure way to help homeowners add curb appeal.

**\$18,750**

A smart investment, a new Therma-Tru entry door can **increase** your home's perceived **value** by **4.2%** or **\$18,750** on average.\*<sup>1</sup>

Homeowners who choose a stylish new Therma-Tru® entry door can see **more than 2 times** the return on their investment.\*

**10 SEC.**

Potential homebuyers will form an opinion about your home's value within **10 seconds** of **seeing it in person.**<sup>2</sup>

<sup>1</sup>www.thermatru.com <sup>2</sup>www.about.com

\*Not based on actual home sales. Not a guarantee of investment returns, increase in value or selling price. Based on a nationwide survey of consumers' estimates of perceived home value based on exterior appearance. Results may vary based on region and home style. Therma-Tru's "National Home Valuation Study" was commissioned by Therma-Tru in 2015 and conducted by TNS, an independent provider of Internet-based research.

## FIND YOUR Home's Perfect MATCH

Get inspired to choose entry doors by design with our Architectural Home Styles Guide to popular home styles. Choose a door that brings out the best of your home's style. Let us help you find your match.

## Door Options

Choose from our many fiberglass doors to create an entry that complements the architectural style of your home. Options include wood-grained, stained or smooth, painted surfaces.

### Classic-Craft® Premium Entryways

These premium fiberglass entryways come in four wood grains or a smooth surface that all rival the look of custom wood.

Classic-Craft entry doors are rated a *Consumers Digest* Best Buy.

### Architecturally correct for true classic beauty.

Doors designed to be architecturally correct, with proportions modeled after classic architectural principles, to create a more premium entryway.

Up to  
25% wider  
panels\*

Classic-Craft Premium Door

Standard Fiberglass Door

**Premium – right down to the edge.**  
A solid hardwood square edge delivers a genuine wood appearance.

**Standard fiberglass bullnose edge.**  
The bullnose profile, typical of other fiberglass doors, detracts from the authentic wood look.

# Door Construction

## Classic-Craft® Premium Entryways

### 1 Enhanced Weather Resistance

No more worries about rotting, warping or twisting. Classic-Craft premium entryways are tested and designed to resist extreme weather conditions and the damaging effects of moisture. Both the top and bottom of the door are protected by composite rails for a longer-lasting entryway.

### 2 Solid Security

Classic-Craft premium entryways feel solid and close with authority. A 4" wide beam of engineered lumber runs from the top to the bottom of the locking side of the door to add mass and rigidity, giving the door weight and a natural wood feel.

### 3 Excellent Durability

Built to stand up to the elements and years of wear, Classic-Craft's fiberglass skins are thicker than other standard fiberglass doors to provide added durability and better long-term performance.

### 4 Higher R-Values

Classic-Craft premium entryways contribute to an energy-efficient home. A polyurethane foam core provides up to four times the insulating R-Value of wood.\*

### 5 Edge-to-Edge Moisture Protection

Resist moisture at every turn – and along every edge. Classic-Craft premium entryways have hardwood and composite edges that help prevent moisture penetration.

\*Comparison of fiberglass to wood doors (both without glass).

Smooth-Star®

## Door Options

### Fiber-Classic® Doors

Get the look and feel of rich Mahogany or warm Oak with excellent performance and value.

### Smooth-Star® Doors

Get a smooth surface for plenty of color options with exceptional performance and value.

Top: Fiber-Classic Oak Collection, Riserva Glass, Door – FC8529, Sidelites – FC8572SL  
Bottom: Smooth-Star, Low-E Glass with SDLs, Door – S84816, Sidelites – S8000SL

# Door Construction

## Fiber-Classic® & Smooth-Star® Doors

### 1 Weather Resistance

Composite rails protect the door at the top and bottom edges to help block moisture that can wick into doors.

### 2 Security

An enhanced lock block combined with a 1-1/4" engineered lumber lock stile increases rigidity and stability.

### 3 Durability

With very little maintenance, a fiberglass door can bring a home years of durability. Unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust.

### 4 R-Values

Built with a polyurethane foam core, Therma-Tru fiberglass doors insulate against cold and heat for exceptional energy efficiency, offering up to four times the insulating R-Value of wood.\*

\*Comparison of fiberglass to wood doors (both without glass).

# EnLiten™ Flush-Glazed Designs

for Classic-Craft®, Fiber-Classic® & Smooth-Star® Doors & Sidelites

Simplified beauty. Resilient designs. At Therma-Tru, we believe your door should always welcome you home – while playing seamlessly into your style. Our EnLiten flush-glazed designs create striking profiles that effortlessly combine indoor and outdoor living spaces, inviting in more natural light than ever. The possibilities are endless, giving you doors that perfectly fit your lifestyle.

## Durable by design.

Double- or triple-pane glass is built directly into the door with a high-performance dual adhesive weather seal. This reduces the potential for air and water infiltration, among other benefits.

### Superior Sound Dampening

Doors with flush-glazed glass do a better job of dampening outside noise compared to a Lip-lite alternative.

### 11% More Energy-Efficient

The Low-E glass used in flush-glazed doors delivers a clear view and is 11% more energy efficient than 1/2" Low-E glass in a Lip-lite frame.\*

### Withstands Winds Up to 167mph

Door systems with flush-glazed glass are designed and tested to withstand wind forces up to 167 mph (DP-50).\*\* (ASTM-E330)

### Up to 16% Wider Daylight Opening

Let in more natural light with up to a 16% increase in visible glass area compared to a conventional lite frame.

Smooth-Star®, Satin Etch Glass with OrePac SDLs,  
Door – S2000XE ©TheHouseDesigners.com

## Warranty riders for peace of mind.

### EnLiten™ Flush-Glazed Rider for Construction & Installation

Provides protection in case of accidental glass breakage during residential and multi-family construction or installation. Therma-Tru will replace the flush-glazed fiberglass door or sidelite.

### EnLiten™ Flush-Glazed Rider for Homeowners

Provides protection in case of glass-related failures due to manufacturer defect. Therma-Tru will furnish \$300 toward installation and replace the flush-glazed fiberglass door or sidelite.

# Hinged Patio Door Systems

A Therma-Tru® patio door with genuine Therma-Tru parts is a complete door system with doors, glass and parts engineered to work together for durability and reliability through the years.

- |  |                                   |                          |
|--|-----------------------------------|--------------------------|
| 1 Multi-Point Locking System (Recommended) | 4 Hinges                          | 7 Sill Pan (Recommended) |
| 2 Bottom Sweep                             | 5 Corner Seal Pads (Inswing Only) | 8 Astragal               |
| 3 Sill                                     | 6 Rain Deflector (Inswing Only)   | 9 Frame Components       |

## Vented Sidelites\*

**Enjoy the view – and a fresh breeze, too.**

- Sturdy stiles and hinges make the unit work as a small swinging door.
- Wide patio mullions provide dependable operation.
- Multi-point lock and continuous system help provide security and stability.
- Convenient removable screens – available in bronze and white – are designed for worry-free use.

\*For inswing use only.

Top: Smooth-Star, Clear Glass, Doors – S2000, Sidelites – S2000SL  
Bottom: Smooth-Star Door – S8200; Granite Glass, Sidelites – S81086XNSL

# Therma-Tru® Door Systems

## Independent Laboratory Performance Testing

At the time of manufacture, Therma-Tru exterior door systems (properly assembled with all genuine Therma-Tru components) have been tested under one or more of the following performance specifications: structural load, uniform load deflection, vertical load resistance, air infiltration, water penetration resistance, forced entry resistance, operating forces, force to latch, deglazing resistance, operating cycle performance, impact resistance, sound transmission, thermal performance and solar heat gain performance. Therma-Tru exterior door systems conform to the applicable Performance Standards / Test Methods that may include ANSI/AAMA/NWWDA 101/I.S.2, AAMA/WDMA 101/I.S.2/NAFS, AAMA/WDMA/CSA 101/I.S.2-A440, ASTM E330, ASTM E547, ASTM E283, ASTM E 331, ANSI/BHMA A156.2, AAMA 1304, AAMA 920, AAMA 925, ASTM E2068, ASTM F842, ASTM E987, ASTM E1300, ASTM E90, ASTM E413, ASTM E1332, ASTM E1886, ASTM E1996, PA/TAS 201, PA/TAS 202, PA/TAS 203, HUD UM89, AAMA 1702.2, 24 CFR 3280, 24 CFR 3282, NFRC 100 and NFRC 200. Refer to [www.thermatru.com](http://www.thermatru.com) for design pressure and other performance ratings.

## Doors

**Recommended Door Overhang** – For best performance, all doors should be protected by an overhang. The recommended size is half the distance from the base of the door to the bottom of the overhang. So, as an example, a distance of 10' for this dimension would require an overhang of 5' minimum. For wetter climates, southern or western exposures, and for double doors, the overhang should be the same as the distance from the base of the door to the bottom of the overhang. In this same example, the dimension is 10' so the overhang should be 10'.

For best performance, double doors to be used in areas with severe weather exposure must be installed using entry alcoves or large soffit overhangs to protect entry unit from exposure. Multi-point locking systems are highly recommended for 8'0" and double door applications.

## Doorlites

Doorlites are insulated, and exposed panes are tempered. Optional wood grilles available for clear doorlites and transoms.

**Inserts** – All glass (except flush-glazed styles) shall be bedded with glazing mastic and secured in doors with screws. Therma-Tru's SMC and BTS doorlite frames are available for most styles except where noted. SMC and BTS frames shall resist significant deformation by heat up to 200 degrees Fahrenheit, regardless of paint or stain color or placement behind a storm door.

PVC doorlite frames and dividers must be finished within 30 days of installation. Failure to do so will increase the chance for product damage of the type that is not covered by the warranty. PVC doorlite frames and dividers are not recommended for use behind storm doors or to be painted dark colors, if exposed to direct sunlight.

**Decorative Glass & Wrought Iron** – Each Therma-Tru decorative glass unit is handcrafted by skilled artisans replicating Old World techniques. Each piece is a unique work of art and many things that would appear to be imperfections (small bubbles, lines and waves within the glass) are normal and are part of the Old World charm.

Condensation occurs naturally in the home, caused by excessive humidity in the air. Often this harmless water vapor can be seen collecting on glass surfaces, such as doorlites. Energy-efficient glass units in Therma-Tru door systems are constructed to keep the glass as warm as possible, reducing condensation build-up. However, there is no such thing as a condensation-free window or doorlite in high-humidity conditions.

**NOTE:** Glass privacy ratings are determined by the 1/2-lite glass size. As a result, the amount of privacy / glass transparency may be more or less than indicated by the privacy rating, based on the glass design and size of the glass that is inserted into the door, sidelite or transom.

Glass designs may differ from depiction due to the size and hand craftsmanship of glass. See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for more details.

## Components

**Adjustable Security Strike Plate** – Proprietary adjustable type, permitting in-out adjustment of door in frame, up to 3/16".

**Hinges** – Minimum hinge size 4" x 4" x .098".

Ball-bearing hinges are recommended for 8'0" doors, doors using heavy lites (e.g., wrought

iron), all 20-Minute Fire-rated fiberglass doors, Impact-rated doors and glass, and all Classic-Craft doors.

Use of the multi-point locking system is highly recommended for 8'0" and double fiberglass doors. Not recommended for steel doors.

Please be aware that single door units built with public access sills have little resistance to water penetration, and double doors built with these sills have a potential to leak if installed exposed to weather. We recommend that units be installed away from weather under large soffits or overhangs.

Use of a sill pan is recommended.

Fiber-Classic and Smooth-Star dentil shelves are not recommended for placement behind storm doors or to be painted dark colors, if exposed to direct sunlight.

## Impact-Rated Products

Impact-rated products must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru product approval. Visit [www.thermatru.com](http://www.thermatru.com) for product approvals and full details on WBDR- (Wind-Borne Debris Region) / HVHZ- (High Velocity Hurricane Zone) compliant products. Follow weather and news reports in order to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

## Fire-Rating Performance Standards

Fire and building codes vary throughout the country and acceptance of products and labels is left to the discretion of the local authorities.

MODIFICATION OF PRODUCTS DESCRIBED IN THIS BROCHURE WHICH CARRY FIRE RATINGS (DOORS AND FRAMES) MAY VOID THE FIRE RATINGS.

Test conducted by Intertek, Warnock-Hersey.

## Limited Warranties

Please be aware of the applicable Therma-Tru Limited Warranty which contains important restrictions, disclaimers, exclusions and conditions, as well as the below listed Installation, Finishing & Maintenance documents, related to the Therma-Tru product purchased (e.g., Fiberglass, Steel, Patio Door Systems), all of which can be obtained from your Therma-Tru seller or found in their entirety at [www.thermatru.com](http://www.thermatru.com):

- Therma-Tru. Fiberglass and Steel Door Systems Residential Limited Warranty: Fiberglass – Classic-Craft, Fiber-Classic, Smooth-Star, and Pulse. Door Systems; Steel – Pulse, Profiles, Traditions and Therma-Tru. Fire Door (TR 12-24) Steel Edge Door Systems.
- Therma-Tru. Tru-Defense. Door System Rider to Fiberglass Door Systems Limited Warranty: Classic-Craft, Fiber-Classic, Smooth-Star, and Pulse. Fiberglass Door Systems.
- EnLiten. Flush-Glazed Construction & Installation Rider to Fiberglass Door Systems Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft, Fiber-Classic, and Smooth-Star. Flush-Glazed Fiberglass Door Systems.
- EnLiten. Flush-Glazed Homeowner Rider to Fiberglass Door Systems Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft, Fiber-Classic, and Smooth-Star. Flush-Glazed Fiberglass Door Systems.
- PrismaGuard. Limited Warranty Rider to Fiberglass Door Systems Limited Warranty for Residential and Multi-Resident Premises: Classic-Craft and Fiber-Classic. Door Systems.
- Same-Day. Stain 5-Year Limited Warranty: Same-Day. Stain and Topcoat for Use on Therma-Tru. Fiberglass Door Systems and Fypon. Stainable Polyurethane Products.

## Installation, Finishing & Maintenance

Installation, finishing and maintenance must be performed according to Therma-Tru's recommendations to comply with warranty requirements. Obtain a copy of the following documents outlining recommendations from your Therma-Tru seller or find them in their entirety at [www.thermatru.com](http://www.thermatru.com):

- Installation Instructions
- Therma-Tru Fiberglass and Steel Door Systems Recommendations for Proper Finishing and Painting or Staining

**NOTE:** Finish colors may vary from an actual application due to fluctuations in finishing or the printing of this catalog. See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for more details.
